

SSAG Aluminium Cantilever Sliding Gate

Complete security solutions, from consultation to installation

The SSAG Aluminium Cantilever Sliding Gate is precision engineered for ease of assembly on site and is capable of operating in the most demanding environments whilst offering reliability and performance.

The hollow section design allows the securing of openings up to 9.5 metres at heights up to 2.4 metres. The gate supports and framework are manufactured from rectangular hollow section and complete with a secure bar infill. Coupled to a high quality 100% Duty Rated 230v Hydraulic Motor the reliability of the gate is assured in all weather conditions.

For Pedestrian and Vehicle safety and in order to comply with British Standards BS EN12453:2001 for Industrial Garage Doors and Gates all Security Solutions gates are offered with safety edge systems as standard.

Security Solutions offers a complete turnkey solution from design to handover along with a comprehensive after sales support to meet your immediate and long term needs.
