

# SSSG Steel Cantilever Sliding Gate

Complete security solutions, from consultation to installation

The SSSG Steel Cantilever Sliding Gate has been designed for the most demanding environments and offers high performance together with premium site security.

Capable of spanning openings of up to 10.5 metres at heights of up to 2.4 metres, the gate supports and framework are manufactured from rectangular hollow section steel and full infill options are available to match a new or existing fence line. Coupled to a high quality 100% Duty Rated 230v Hydraulic Motor the reliability of the gate is assured in all weather conditions.

For Pedestrian and Vehicle safety and in order to comply with British Standards BS EN12453:2001 for Industrial Garage Doors and Gates all Security Solutions gates are offered with safety edge systems as standard.

Security Solutions offers a complete turnkey solution from design to handover along with a comprehensive after sales support to meet your immediate and long term needs.
