

SSB 9000 Heavy Duty Automatic Rising Arm Barrier

Complete security solutions, from consultation to installation

The SSB 9000 range of Heavy Duty Rising Arm Barriers offer rugged long term reliability, durability and are capable of spanning openings of up to 9 metres.

Driven by a powerful 3 Phase inverted Motor/Gearbox Assembly, the barrier is smooth and quiet during operation and being 100% Duty Cycle Rated offers continuous operation for heavy traffic environments

Utilising PLC control, the unit offers future proof control system upgrade flexibility.

When your application calls for a heavy duty commercial traffic barrier capable of withstanding the most extreme environments, the SSB 9000 is the right barrier choice for your site.

Security Solutions offers a complete turnkey solution from design to handover along with a comprehensive after sales support to meet your immediate and long term needs.
