SSSB Cobra Shallow Mount Retractable Bollard

V7500(N2)/64/90:0/0
V7500(N2)/48/90:0/0 & V7500(N2)/48/45:0/0

Complete security solutions, from consultation to installation

The SSSB Cobra Crash Rated Shallow Mount Retractable Bollard offers an aesthetic alternative to traditional physical security products whilst maintaining a secure site by preventing vehicle access

Increasing underground services constraints highlighted the need for a Shallow Mount Crash Rated Retractable Bollard to overcome the installation challenges of traditional foundations required for high security products.

Perimeter access specialists Security Solutions developed and successfully crash tested the innovative SSSB Cobra shallow mount retractable bollard to meet the strict testing criteria of BSI PAS 68:2010 with zero penetration at 64kph and 48kph. Video footage of the SSSB Cobra Bollard bringing a 7.5 Tonne vehicle to a complete stop is available to view on our website.

The SSSB Cobra Bollard acts as a visual deterrent whilst enhancing the aesthetics of the surrounding environment and is a cost effective product for the Anti Terrorist and the High Security PAS market.

Security Solutions offers a complete turnkey solution from design to handover along with a comprehensive after sales support to meet your immediate and long term needs.

CPNI's Reference Number Explained

V7500(N2)/48/90:0/0 & V7500(N2)/48/45:0/0

Test Method: (VP.D) VEHICLE PENDULUM OR DESIGN
