Service and Maintenance Solutions

Security Solutions Service and Maintenance team realises its customers are all individuals with differing requirements. We have designed both financial and maintenance packages to suit any circumstance enabling you to clearly define your annual maintenance budget.

There are three types of service and maintenance packages available as well as emergency call out cover for non contracted customers which cover and are not limited to the following equipment:-
Barriers, Turnstiles, Blockers, Bollards, Gates & Fencing, Access Control

Why Choose Security Solutions for your Service and Maintenance needs?

1. The flexibility of choosing from three alternative tailored packages: Magenta, Blue and White (see over page)
2. Free site survey and quotation
3. Fast, reliable and professional service
4. One supplier and one 'point of contact' for all your service needs
5. 24/7 customer service call centre with guaranteed response time
6. Professional site engineers with fully equipped service vehicles
7. Scheduled maintenance ensures minimal risk of unplanned breakdowns and unexpected costs as we can advise when parts show signs of wear and tear
8. Safety parts are regularly checked, reducing your risk of accidents thus ensuring health and safety regulation requirements for workplaces are fulfilled and maintained
9. CHAS, Safe Contractor, Constructonline, DHF Powered Gate Group and ISO-9001 Accredited Company
10. Maintain security and safety of both your site and your personnel

Questions to think about

1. How many times does your access equipment operate per day ?
2. How many days per year is your access equipment in use ?
3. How essential is each single item of access equipment in your operation ?
4. When your access equipment malfunctions does it become a serious issue in your day to day operations and/or site security ?
5. Would it be beneficial to predict beforehand the annual running costs of your access equipment ?

Health & Safety Requirements

In accordance with the supply of machinery (safety) regulations 1992, it is a requirement that the end user/customer of all industrial and automated systems shall establish a full documented maintenance regime in accordance with the manufacturers recommendations. It is also a requirement of British Standards (BS12453) that a biannual service of safety systems be carried out by a competent body.

Contract Exclusions:

1. All spare parts or components used to restore the equipment to the required operational standard will be charged at the rate applicable at the time.
2. All labour & travel costs other than contracted visits.
3. All repairs resulting from vandalism, misuse, customer error, or accidental damages (e.g. Vehicle impact) will be charged for at the applicable 'Call Out' rate.
