

SSB 8000 ECO Automatic Rising Arm Barrier

Complete security solutions, from consultation to installation

The SSB 8000 ECO range of Automatic Rising Arm Barriers have been designed and tested to exceed 2,000,000 cycles offering durability and long term reliability.

Utilising the latest in electronic programmable controls, the SSB 8000 ECO has integrated loop detectors to interface with the most complex control systems along with the inbuilt reverse on contact feature. The modern sleek design with the option of round or elliptical boom arms both supplied with rubber along the bottom for protection.

Driven by a Hydraulic pump, the barriers are smooth and quiet during operation and being 100% Duty Cycle Rated offers continuous operation for heavy traffic environments.

Ideal for commercial, Industrial, Retail or high quality residential applications the SSB 8000 ECO can be designed to suit your specific requirements.

Security Solutions offers a complete turnkey solution from design to handover along with a comprehensive after sales support to meet your immediate and long term needs.
