

SSDG Domestic Hinged Gates

Complete security solutions, from consultation to installation

The SSHG Domestic Hinged Gates have been aesthetically designed and manufactured to offer full security for domestic applications by combining quality construction techniques with high performance components. The gateposts and frames are manufactured from rectangular hollow section steel and with full infill options available to match a new or existing entrance. The gates can be automated by high quality 230v hydraulic rams, or for a more aesthetic appearance under ground hydraulic operators can be installed to ensure reliability of the gate system in all weather conditions.

For Pedestrian and Vehicle safety and in order to comply with British Standards BS EN12453:2001 for Industrial Garage Doors and Gates all Security Solutions hinged gates are offered alongside Safety Loop and Photocell Systems..

Security Solutions offers a complete turnkey solution from design to handover along with a comprehensive after sales support to meet your immediate and long term needs.
