

# SSHG Hinged Gate

Complete security solutions, from consultation to installation

The SSHG Hinged Gates are designed and manufactured to offer full site security for all industrial applications by combining quality construction techniques with high performance components. Capable of spanning openings up to 10 metres at heights up to 3 metres. The gate supports and frame are manufactured from rectangular hollow section steel and with full infill options available to match a new or existing fence line. The gates can be automated by high quality 100% Duty Rated 230v hydraulic rams, or for the most demanding applications a Motor & Gearbox unit to ensure reliability of the gate system in all weather conditions.

For Pedestrian and Vehicle safety and in order to comply with British Standards BS EN12453:2001 for Industrial Garage Doors and Gates all Security Solutions hinged gates are offered alongside Safety Loop and Photocell Systems.

Security Solutions offers a complete turnkey solution from design to handover along with a comprehensive after sales support to meet your immediate and long term needs.

### Our Service - A Complete Solution

Security Solutions manufacture, install and maintain perimeter security equipment. With many years experience in the industry we offer a complete range of services including Design, Installation, Maintenance and Service of new and existing equipment.

We provide a range of high quality, cost effective physical access security solutions that meet or exceed the requirements of today's security conscious company.

Whether it be controlled entrance & exit to your site, control of your car parking, additional access points in your perimeter fencing or high security protection of your sensitive areas or products; Security Solutions has the answer to your problem.

We pride ourselves not only on the quality of our workmanship but also on the advice that can be provided from our experienced staff. If you are considering enhancing your current security we would be delighted to provide you with a no obligation site survey and quotation.

If you require more information or a representative to contact you, please call us directly on + 44 (0)845 604 8144
