

# SSMB 9000 Manual Rising Arm Barrier

Complete security solutions, from consultation to installation

The SSMB 9000 range of Manual Rising Arm Barriers have been designed for applications where a power supply is not available or practical.

With a 3 metre up to 9 metre fully weighted counterbalanced boom length, pivoted on heavy duty bearings for easy smooth operation.

The boom arm can be fully locked secure in the vertical position and horizontal position for extra security. The SSMB 9000 has a range of optional accessories listed in the table opposite.

Security Solutions offers a complete turnkey solution from design to handover along with a comprehensive after sales support to meet your immediate and long term needs.

### Our Service - A Complete Solution

Security Solutions manufacture, install and maintain perimeter security equipment. With many years experience in the industry we offer a complete range of services including Design, Installation, Maintenance and Service of new and existing equipment.

We provide a range of high quality, cost effective physical access security solutions that meet or exceed the requirements of today's security conscious company.

Whether it be controlled entrance & exit to your site, control of your car parking, additional access points in your perimeter fencing or high security protection of your sensitive areas or products; Security Solutions has the answer to your problem.

We pride ourselves not only on the quality of our workmanship but also on the advice that can be provided from our experienced staff. If you are considering enhancing your current security we would be delighted to provide you with a no obligation site survey and quotation.

If you require more information or a representative to contact you, please call us directly on + 44 (0)845 604 8144
