

# SSRB High Security Road Blocker

Complete security solutions, from consultation to installation

The SSRB High Security Road Blocker has been designed to offer uncompromising rugged performance for the most demanding of environments. Designed as the ultimate deterrent against vehicular access the Road Blocker offers rapid performance together with premium site security.

The Road Blocker is offered in two standard heights of 500mm or 800mm and four standard widths from 2m through to 5m. Manufactured from fully galvanised steel the Road Blocker is coupled to a high quality 100% Duty Rated Hydraulic Power Pack providing assured reliability in the most extreme weather conditions.

Security Solutions offers a complete turnkey solution from design to handover along with a comprehensive after sales support to meet your immediate and long term needs.

### Our Service - A Complete Solution

Security Solutions manufacture, install and maintain perimeter security equipment. With many years experience in the industry we offer a complete range of services including Design, Installation, Maintenance and Service of new and existing equipment.

We provide a range of high quality, cost effective physical access security solutions that meet or exceed the requirements of today's security conscious company.

Whether it be controlled entrance & exit to your site, control of your car parking, additional access points in your perimeter fencing or high security protection of your sensitive areas or products; Security Solutions has the answer to your problem.

We pride ourselves not only on the quality of our workmanship but also on the advice that can be provided from our experienced staff. If you are considering enhancing your current security we would be delighted to provide you with a no obligation site survey and quotation.

If you require more information or a representative to contact you, please call us directly on + 44 (0)845 604 8144
