

# SSSRSG SALUS Sliding Gate

LPS 1175 Issue 8. B3 (SR2) C5 (SR3)

Complete solution **Total control**

Complete security solutions, from consultation to installation

The **SSSRSG SALUS LPS1175 Issue 8 Sliding Gate** is a top-tier security solution designed to meet the highest standards for perimeter protection. With its robust B3 (SR2) rating, the gate is well-suited for medium-risk sites, offering effective resistance to unauthorized entry and vandalism. For higher-risk environments, the gate's C5 (SR3) rating ensures it can withstand more sophisticated and prolonged attacks, making it an ideal choice for high-security areas such as industrial sites, government facilities, and critical infrastructure.

This sliding gate has been rigorously tested to ensure compliance with the latest LPS1175 Issue 8 standards, providing enhanced durability, resistance to forced entry, and protection against a variety of threats. The design focuses on both security and functionality, featuring a sleek sliding mechanism that saves valuable space while still offering top-tier protection. Its advanced construction makes it resistant to tampering, offering peace of mind to property owners and security managers.

The SSSRSG SALUS LPS1175 Sliding Gate's versatility, paired with its ability to meet stringent security criteria, makes it the ideal choice for businesses and organisations looking to secure their premises. Whether protecting a commercial complex, industrial yard, or government building, this gate delivers superior performance and reliability, ensuring the safety and security of your assets.
